## Introduction to Online Earning

*You can find millions of people around the world who are interested to earn money through online. The common keywords or key phrases searched in the google are make money online, how to make money online, earn money online etc etc. According to the google statistics the most searched*

*keyword in the online earning category is 'earn money online easy'. It is estimated to have more than 1 million searches globally per month. There is a huge competition between websites designed for the Search engine rankings and the websites designed to make business through online schemes. This makes the common user confused about the genuine online programs. This is the biggest problem in finding the legitimate sites.*

## Don't pay a single penny until you are a webmaster

*I've come across many websites which pretend themselves as cash generating machines. They simply make you predict that you will be a millionaire or a billionaire within 1 year or something. If that is the case then half of the world's population will be wealthier. There is no shortcut for success. I'm not emphasizing that it is impossible. You can't be a millionaire overnight but it takes some time to happen.*

*So why did I put that heading 'Don't pay a single penny until you are a webmaster'.*

*Okay let me explain it. If you want to earn handsome money there is no need to pay someone to buy quick earning schemes and guides.*

*It is absolutely free of cost.*

*It needs dedication and perfect strategic planning.*

Like

**Step 1 -You think of any subject that you are interested in.**

**You can write anything about your personal experiences,interests,hobbies,favorite things,persons,products,websites,services etc.As I'm interested in online business I've chosen this topic to share with you all.**

**Step 2-The content should be original.You should not blind copy the content from any website or blog.It should be unique.**

**Step 3-You should be able to update the content frequently at least twice in the week.**

**Step 4-You can put the images and videos on your blog as there are no limitations on hosting.Hosting is free.**

**Step 5-You can add third party software widgets or gadgets to your blog.**

**Step6-You need to advertise your blog through word mouth,social networking sites,email marketing etc to generate good traffic.**

**Step 7-Once the users find your blog useful then there is no need to advertise further.But,you need to update it.**

**Many successful Infopreneurs (Internet Entrepreneurs) started their career as bloggers.**

**You can even redirect your blogs to the custom domains with .com,.org,.info,.net,.biz etc.**

**I personally recommend to buy the custom domains from for the best offers.**

**I'm posting two videos on creation of Blog in Blogger and Wordpress.**
